## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 2 September 2003 have been fully considered but they are not persuasive. The applicant argues that the drug delivery device of Wolf does not deliver the drug over a plurality of breaths. However, Wolf teaches a device with an inhalant canister package containing an amount of drug. The drug is delivered over a plurality of breaths before the package is exhausted. Therefore, reads on the amended claim.

The applicant also argues that Wolf does not teach a trend generator of analyzing the breath information and characteristics of the patient's breathing over a number of drug deliveries. However, Wolf does teach analyzing the breath information and characteristics of the patient's breathing over a number of drug deliveries (col. 6, lines 10-16). Therefore, Wolf reads on the amended claim.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Wolf 5809997.

4. Wolf teach a system and method for delivery of a drug to a patient comprising: a drug delivery device including a breath analyzer (col.5, lines 60-67, and col. 6, lines 1-
